

The Arlington EggProject

www.ArlingtonEggProject.org

Dear Arlington County Board Member,

We, the undersigned Arlington County residents, appreciate urban agriculture and the potential for residents of urban communities to produce healthful food and help protect the natural environment by reducing dependence on industrial-scale farming. We believe that small-scale backyard hen-keeping and the wholesome eggs they produce can be an integral part of sustainable urban agriculture. *We publicly seek modifications of Arlington County ordinances so as to allow backyard hen-keeping in Arlington neighborhoods and to limit the number of backyard hens, prohibit roosters, and help ensure secure, proper and humane housing for hens.*

Sincerely,

The Arlington Egg Project and the undersigned Arlington County residents
